

Type-E

PGS-CLE

SANWA
New Arrival

Release From Regulation

Stable Working With ANY ESC

Stable Servo From Low Power Supply

Programmable Servo

3 Different Types Preset

(Base / Quick / Drift)

PGS-CLE

Type-E

SANWA

New Arrival

Spec

- SXR and SSL compatible
- Waterproof (Same as IPX4)
- AL Heat Sink
- Metal Gears
- Coreless Motor
- Compatible with Multi-Setting Gear
- ◆ Voltage : 4.8 - 7.4 V
- ◆ Speed : 0.09 sec/60° (7.4V)
0.11sec/60° (6.0V)
- ◆ Torque : 12.8 kg · cm (7.4V)
10.8 kg · cm (6.0V)
- ◆ Size : 40.5 x 20.5 x 26.5 mm
- ◆ Weight : 50.4 g

***Recommend ESC BEC: Above 1.5A**

Tips for PGS-CLE

PGS-CLE is developed for low power supply ESC. Low class ESC model BEC (Battery Eliminator Circuit) sometimes cannot supply enough power for servo.

PGS-CLE can be stable working even if cannot supply enough power from ESC.

3 different types preset can be set.

1. BASE (Standard mode)
2. QUICK (Aggressive mode)
3. DRIFT (Drift mode)
